PROFESSIONAL SUMMARY

Java Backend Developer with 1+ year of experience building scalable RESTful APIs using Spring Boot, MySQL, and MongoDB. Skilled in clean code, MVC architecture, unit testing, and version control with Git/GitHub.

TECHNICAL SKILLS

- **Languages:** Java, SQL
- **Frameworks:** Spring Boot, Spring MVC, JPA, Hibernate
- **Databases:** MySQL, MongoDB
- **Tools:** Git, GitHub, Maven, IntelliJ IDEA, Postman, JUnit
- **DevOps:** Docker, Kubernetes, AWS
- **Messaging:** Apache Kafka
- **Concepts:** REST APIs, MVC, OOP, CRUD, Unit Testing, Agile

PROFESSIONAL EXPERIENCE

Java Backend Developer – Self-Paced Projects *May 2025 – Present*
Remote — Full-time

- Working independently on real-world backend apps using Java and Spring Boot.
- Designed and implemented REST APIs using MVC pattern with database integration.
- Integrated MySQL and MongoDB for CRUD operations and data persistence.
- Wrote unit tests with JUnit, tested APIs using Postman.
- Managed code via Git/GitHub and built projects using Maven.
- Followed Agile-like workflow and contributed actively on GitHub.

Java Back End Developer (Internal Projects) – Concentrix *Apr 2024 – May 2025*
Bangalore — Full-time

- Developed scalable backend systems and micro APIs using Java Spring Boot.
- Created and tested RESTful APIs; integrated MySQL and MongoDB.
- Followed MVC architecture and clean code principles.
- Used Git/GitHub for version control; managed builds via Maven.
- Practiced Agile methods and actively participated in internal releases.

PROJECTS

Student Journal *May 2025 – Present*
Spring Boot, MongoDB, REST, JUnit, Postman
Built a CRUD-based journaling REST API using MongoDB and Spring Boot. Designed endpoints for Create, Read, Update, Delete. Structured code using MVC pattern. Tested endpoints with Postman; unit tested with JUnit. Hosted on GitHub.Link

Ticketing Tool (Ongoing)
Spring Boot, MongoDB, REST API, Java
Building a RESTful ticket management system for issue tracking with user and admin roles. Integrated MongoDB Atlas for cloud data persistence. Implementing CRUD operations, custom endpoints, and structured logging. Focused on modular design and scalable backend architecture. Link

Spotify UI Clone
HTML, CSS, JavaScript, Bootstrap
Created a responsive clone of the Spotify UI. Used JavaScript for player functionality and Bootstrap for layout responsiveness.

EDUCATION

Bachelor of Engineering – 8.3 CGPA *2018 – 2022*
KLE Technological University, Hubli

CERTIFICATIONS

- Java Full Stack Development Bootcamp – Jspiders
- Fundamentals of SQL – Udemy
